If There's a Road Leading to  
Your House—Our Trucks Will  
Deliver Free to Your Door

HERE'S the last important step in our complete Building Material service—free motor truck deliveries to all points within 35 miles of our plant. Throughout the length and breadth of more than 2,500 square miles our great fleet of 50 motor trucks make daily deliveries to the thousands of our customers in New York and the Metropolitan area. Just tell us what you want and when you want it—then rest assured your materials will reach you on schedule. These perfectly timed deliveries protect your materials from weather and against theft, bringing the right articles to you at the right time and as your work progresses.

Free delivery of your selections will be made by our fleet of motor trucks to all points within the area of this map. If you live a few miles beyond any of the border points, we will arrange to make delivery by truck for a slight charge. To more distant points, shipment will be made by freight or express as desired.

## Insures Satisfaction to Every Customer

Harris Bros. Co.,  
25th & Iron Sts.,  
Chicago, Ill.

Gentlemen:

I am enclosing money order in the amount of \$46.80, which covers the balance due on my account with you. Kindly furnish receipt showing payment in full of all accounts to date.

I wish to take this opportunity to express my appreciation and thank you for the accommodations and courtesies extended to me during our dealings. Without your accommodations the building of a home would probably have been impossible; without your courtesies much of the satisfaction derived therefrom would probably have been lost.

Thanking you, I am

Respectfully yours,  
Guy F. Chapman  
25th & N. Deaderwood.

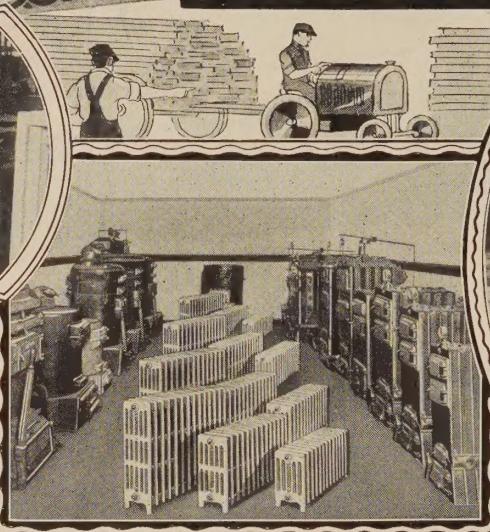

Harris Bros. Co.  
and Son Co.  
Chicago Ill.

## VIEWS OF OUR BIG

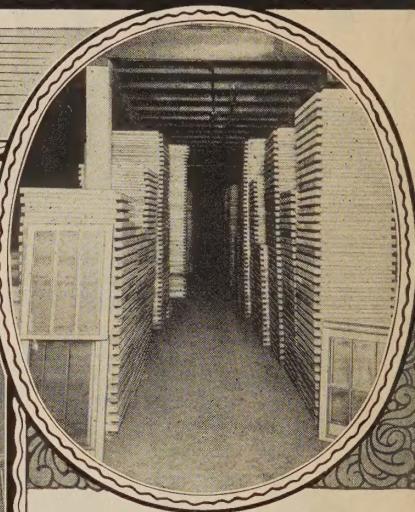

A corner in our sash factory where windows and sash of every description are manufactured under our direct supervision.

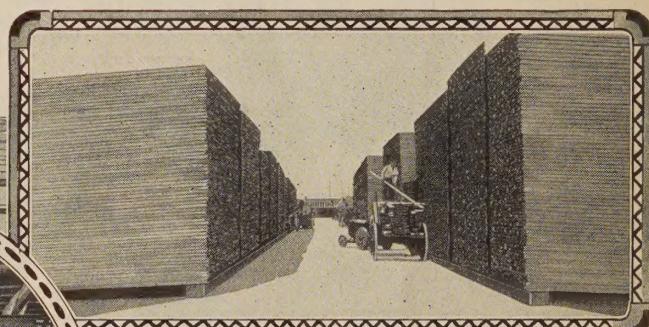

Above—a section of our big heating material warehouse where complete heating systems are assembled.

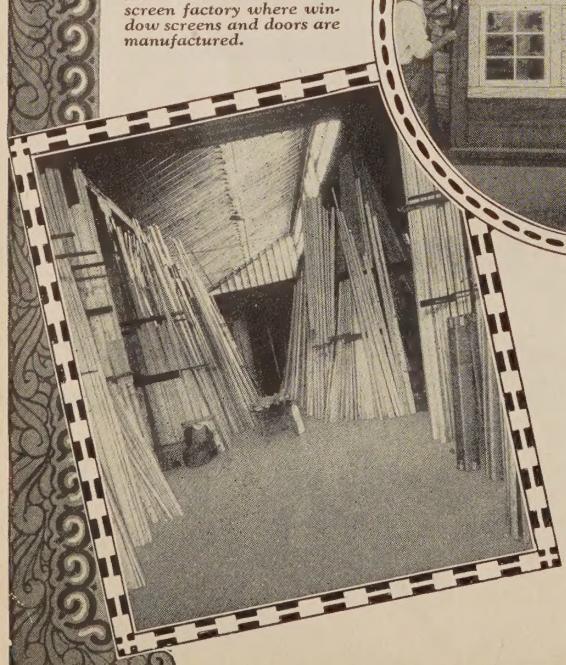

Above—A corner in our screen factory where window screens and doors are manufactured.

An aisle in our sash and window warehouse where thousands of stock sizes are always ready for quick delivery.

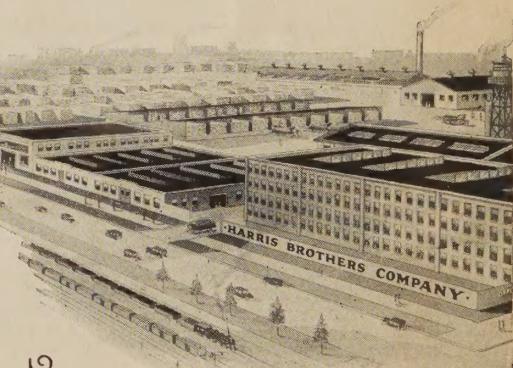

One of the lumber streets in our big material yards where over 10 million feet of finest lumber is stored.

Above—Patented equipment and exclusive methods are employed in making our guaranteed no-sag garage and warehouse doors.

At left—An aisle in our moulding and interior trim warehouse where millions of feet of modern trim stock is stored.

### Main Offices

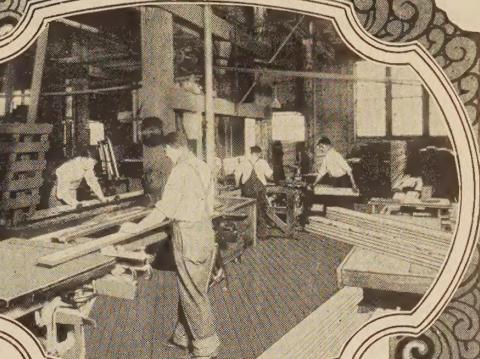

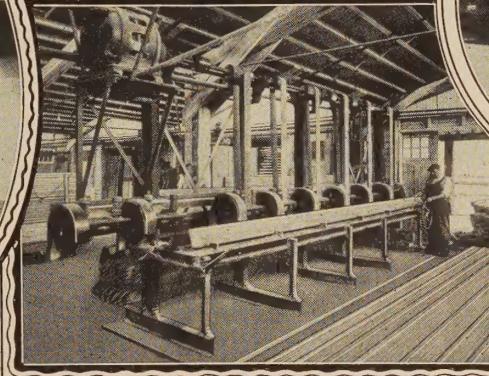

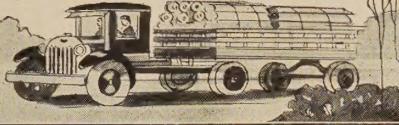

View of our Headquarters Plant, Executive Building, Sales Offices, Show Rooms, Factories and Warehouses—America's Building Material Headquarters. Largest plant of its kind serving American home owners direct from factory.

# Material Headquarters

FACTORIES and STOCKS

Doors in all styles and sizes for every purpose. A glimpse of our big stock.

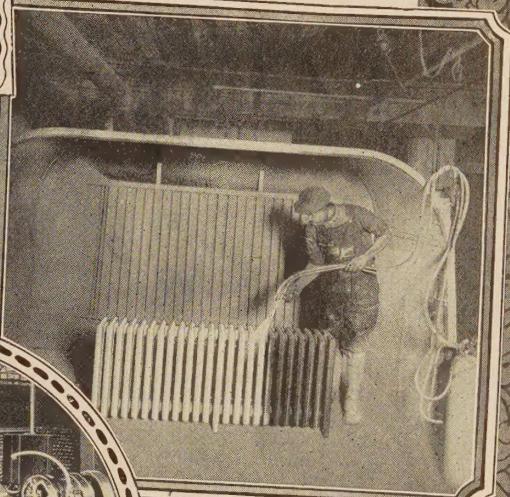

A scene in our splendidly equipped mill-work factory where modern machines aid us in bringing low prices to you.

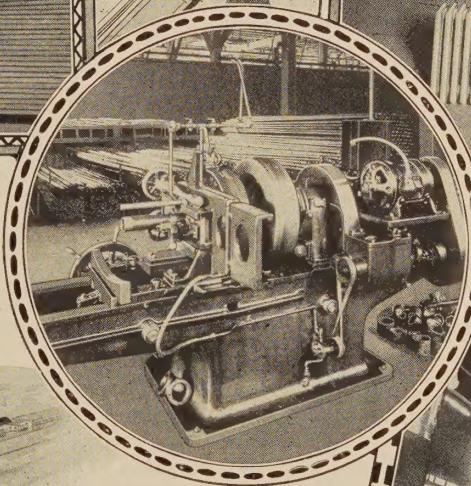

One of our mammoth finished lumber sheds protecting choice woods for Homes, Garages and Millwork.

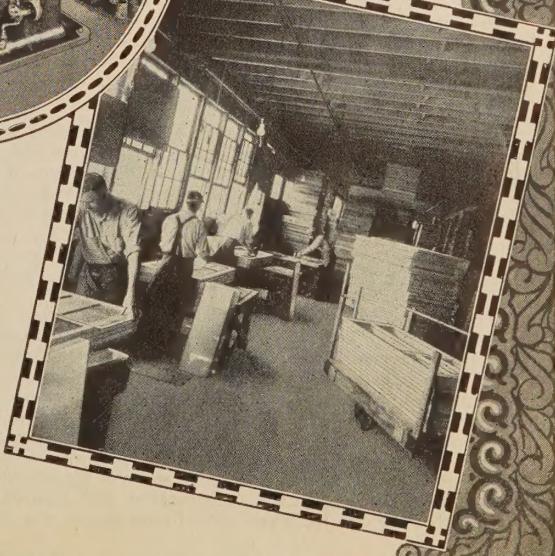

Above—Patented machinery designed by our own engineers save lumber and labor in preparing materials for Harris buildings.

Above—Radiators for our heating systems are beautifully enameled before they are delivered to you.

Above—Latest high speed pipe cutting and threading machines prepare materials for Harris "Perfection" heating systems.

At right—A corner in our glazing room where your windows, sash and doors are glazed by experts under perfect conditions before delivery to you.

## and Factories

In this gigantic plant we have organized the nation's most complete and thorough building material service. Enormous stocks of everything needed to build, improve and repair your property ready for quick delivery at lowest prices.

# Harris Plan-Cut Homes

## Carpenter & Mason Built FRAME-BRICK-STUCCO-BRICK VENEER

America's foremost collection of substantial carpenter and mason built, frame, brick, stucco and brick veneer Perfection Harris Homes which are being built in the best residential districts. Carefully planned by experts in every conceivable design and built of finest materials. They comply with all building laws, rules and regulations.

Harris Perfection Homes are "Plan-Cut," which means all dimension lumber is accurately framed by experts with the aid of most modern machinery, here in our factory in Cresskill, N. J. All materials prepared on a tremendous scale without waste, which saves you from \$500 to \$2,000 when you build yours.

If you intend to build, be sure to get all details of this greatest of all home offers. When we show you the time and money saving advantages embodied in our wonderful service you will be delighted with the genuine value of our complete line.

## Free Architectural Service

Complete working blue print plans and material lists of any of the following designs are furnished absolutely free of charge to home purchasers. Plans are furnished for homes as pictured or reverse, and—best of all—changes will be made to incorporate your own ideas. It would be impossible to catalog here 3500 special designs that have been prepared for our customers, but these are available for inspection at our office. Architectural service without charge is also offered to those of our customers who want a design entirely of their own planning.

## Three Ways to Build

**Plan No. 1**—Buy material at cash prices shown for a Harris plan cut home and build it yourself. No chance to make a mistake here.

**Plan No. 2**—Buy a Harris plan cut home and let a contract for the construction with a reliable builder. You act as superintendent.

**Plan No. 3**—Let us furnish all materials and labor for the Harris Home of your choice, built on your lot as ordered. Erected price on application.

## Financial Help for You

For the convenience of our customers who would like to be relieved of the detail in connection with home financing, we will arrange for all mortgage money necessary. It is surprising, really, how little ready cash is necessary to own a Harris Perfection Home.

Property valuations and other unknown conditions make it desirable to work out each individual case accordingly. Therefore, we invite you to call at our office or write or phone for the Harris Home man who will gladly and without obligation on your part, work out a plan of financing the home of your choice.

Our complete financing service includes legal work in connection with titles and abstracts, insurance, inspection and surveys, to responsible parties who desire to own a home of their own. You are invited to make use of our bureau of free information for home owners established here for the convenience of our customers.

## Expert Individual Service

This is your invitation to visit our main office and factory here at Cresskill, New Jersey, or any one of our material displays and salesrooms conveniently located in New York where you can see actual photographs of all homes pictured on the following pages and get full information regarding material and construction costs on the Harris Home of your choice. Better still, a phone call to the main office or any one of our Branches will bring an experienced sales engineer to your home any time of the day or evening with a complete set of large photographs, plans and complete details of construction and financing. In a single visit you get full information and positive proof by facts and figures that we can help you get a better home at a real saving.

## "PERFECTION" HARRIS HOMES

### Brief Specifications of Material

We furnish for cash prices shown, in accordance with blue print plans and material lists for each Harris Perfection Home.

**FOUNDATION**—Plank basement sash frames, plank door frames, girder posts, girders and 4x6 sills. No. 1 Fir or Hemlock. No masonry material.

**FRAME**—Main floor beams, studding, ceiling beams, rafters, No. 1 Fir or Hemlock spaced 16" on centers. Headers and liners doubled around door and window openings. Single 2x4 plate below and double 2x4 plate above on all partitions. All porch framing also included.

**WALLS**—No. 1 lath and grounds for all inside walls, ceilings and partitions. No. 1 sheathing for outside walls. Interior frame covered with insulating felt and your choice of  $\frac{1}{2}$ x6 or 8 clear Redwood batten siding, or, Perfection Red Cedar shingles.

**NOTE:** For brick homes we furnish furring strips, lath, lintels and top wall plates only for outside walls. For stucco exteriors we furnish many of the patent sheathing boards such as Byrkit, Gyp lap, Celotex, etc., with galvanized reinforcing wire, but prices shown do not include stucco plaster material. No masonry material.

**ROOF**—1x6 matched lumber over exposed rafters with sound tight roof sheathing and certified brand asphalt slate surfaced shingles, best quality. Colors Red or Green.

**PORCH**—All materials except masonry furnished for porches to be built as shown.

**OUTSIDE FINISH AND FLOORING**—Porch floor and ceiling clear Fir. Outside finish made of White Pine or Cypress.

**FRAMES**—Clear White Pine window and door frames with casings  $1\frac{1}{8}$ " thick.

**WINDOWS**— $1\frac{3}{4}$ " thick, clear White Pine furnished with weights and cord in patterns shown in photographs, clear glass, double strength, tacked and putted.

**DOORS**—Front door  $1\frac{3}{4}$ " thick and inside doors clear Fir. Doors may be selected from our building material catalogue.

**OAK FLOORING**— $1\frac{1}{16}$ x $2\frac{1}{4}$  inch face, select Oak flooring for first floor. Second floor may be either Oak or Yellow Pine flooring according to design of house.

**INTERIOR TRIM AND JAMBS**—Your choice of any pattern shown in building material catalogue in clear Yellow Pine or White Pine. Oak, Birch or Chestnut can be furnished at slight additional cost. No cabinet work included.

**HARDWARE**—All outside lock sets solid bronze. All inside lock sets, butts, sash locks, sash lifts, cord and weights and necessary nails of every description are furnished. Selection of hardware may be made from our building material catalogue, or from our designs on display.

**PAINT**—Guaranteed ready mixed lead and oil house paint for a 3-coat job outside over all woodwork. Stain, shellac and varnish for 3-coat job inside.

We will be glad to give detailed specifications and any information desired on any home that you may select.

**NOTE:** We do not furnish masonry materials of any description. Our engineers have prepared complete plans for guaranteed plumbing and heating systems for all our homes, prices quoted, on application.

## Quality & Quantity —GUARANTEE—

WE guarantee to furnish sufficient quantities of material as outlined in our itemized list of materials, and specifications, to construct each Home according to our Blue Print plans. Further, that all materials will measure up to the high standard of quality specified or better. That each item will reach your building site safe, sound and in perfect condition.

This means that there will be no extras, unless you choose to order additional materials or alter construction as the work on your Home progresses.

# Harris Economy Homes

## Carpenter and Mason Built

### PLAN CUT

#### Moderately Priced and Substantially Built

Harris Economy Homes as illustrated in the following pages will be of particular interest to those who wish to build a moderate priced home for an investment. From our hundreds of practical designs you can choose one correctly proportioned for any sized lot. We furnish only highest quality, bright clear stock, same grades as specified in our "Perfection" Homes, guaranteed to give you complete satisfaction.

#### Three Ways to Build

Our home building plan meets the requirements of everyone:

- 1—Buy the material we furnish and build a "Harris Economy Home" yourself.
- 2—Buy our materials and let your own carpenters do the work under your supervision.
- 3—Let us furnish all material and labor for your "Harris Economy Home" built on your lot as ordered. Price on application.

#### Reliable Architectural Service

Complete working blue print plans and material lists of any of the following designs are furnished absolutely free of charge to our home purchasers. Plans are furnished for homes as pictured or reverse and changes will be made to suit wherever necessary.

#### Financial Help for You

We arrange for all mortgage money. The Harris Home Man is prepared to complete all details of construction and financing in a single visit with you.

If You Are a Lot Owner  
Why Not a Home Owner!

Harris Dependable Homes have been designed with utmost care to make them attractive in design and with floor plan arrangements that may be changed to meet individual requirements.

They are ideal for all year homes, yet many hundreds of these bungalows have been built for use as summer homes.

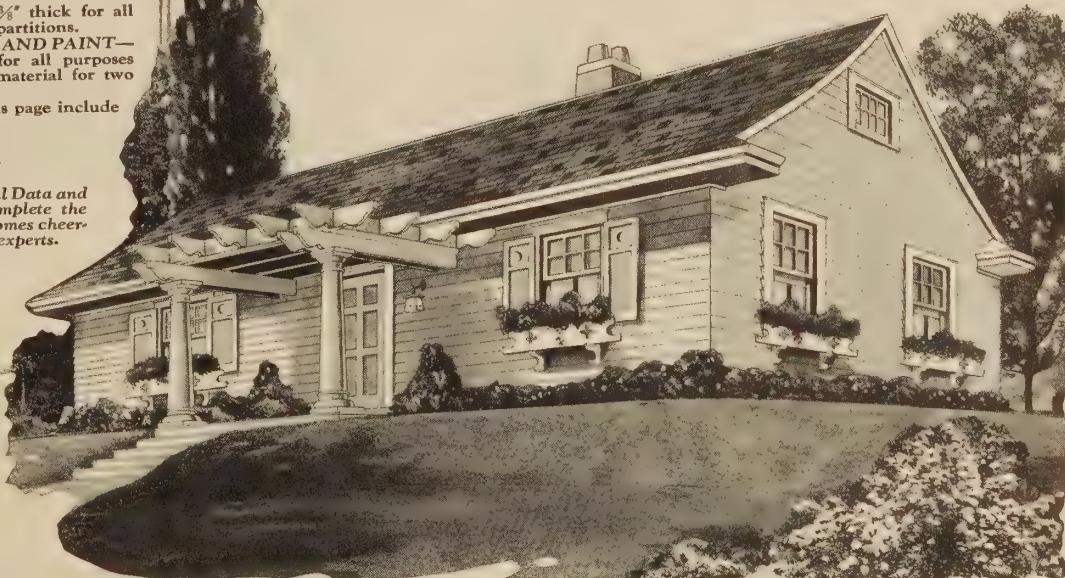

The easiest payment plan available is offered on all Harris Dependable Homes.

Under our easy payment plan you will not only reduce your living expenses, but in the end you will own a beautiful home instead of a handful of worthless rent receipts.

A small cash payment is all we require—the balance arranged in easy monthly payments, just like rent.

In standardizing these attractive designs we offer you a complete Home building service, free from all worry, risk, loss and extras. With the arrival of the first delivery of material our construction crew start building your Home at once. Their wide experience, speed and accuracy mean perfect construction in the shortest possible time.

We furnish guaranteed quantities of materials and labor as specified. Blue Prints and complete material specifications gladly furnished on request. A telephone call will bring an expert to your home with all details.

# Details of Harris Patented Garage Something New

## "Quick-Lock" Swinging Doors

A new swinging door lock, opens with a key and locks automatically—does away with foot and chain bolts and cumbersome inside locking bar—locks tight and holds doors in perfect shape.

This new and ingenious invention is so simple and wonderful in its operation that once you have it on your garage door you will never be without it.

A simple turn of the key in the lock and you are on the inside.

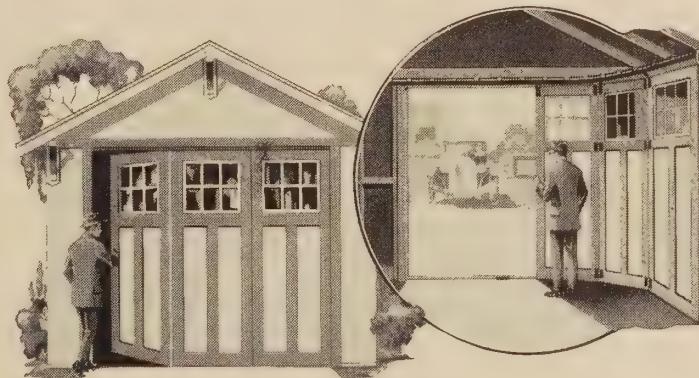

When you drive out, just push the doors shut and they are locked automatically. No more going inside to let yourself out. Saves much time and annoyance.

Adjustable floor and ceiling plates allow for adjustment in the event sill becomes jammed with mud or ice.

Remember that our SWINGING DOORS are guaranteed "no sag" manufactured exclusively by us right here in our own factory. They have a diagonal countersunk brace not found on any door of other makes. They are guaranteed right. There are over 30,000 of our SWINGING DOORS in use and we highly recommend them. Our doors are made of clear kiln dried Oregon Fir lumber.

"Quick-Lock" Swinging Doors are standard equipment and will be furnished on all Garages unless you specify the "Rollaway" Sliding Doors.

## Harris (PAT'D) "Rollaway" Sliding Doors

HARRIS (PAT'D) "ROLLAWAY" DOORS are the result of many years of careful study in "ROLLAWAY" SLIDING DOORS. These doors slide around the corner on the inside of the garage. One of the three doors can be used as a service door. Ninety per cent hardware is applied here at the factory, the balance anyone can apply should he decide to do his own erection.

This patented "ROLLAWAY" Sliding Door hardware is brand new, and is complete to the last detail—the doors are hung on roller bearing wheels with special cup track and curves. Roller bearing hangers run inside of this cupped track and cannot jump out.

Extra heavy combination hinges and hangers, special floor guide with wedge permitting weather tight adjustment at sill, special anti-friction roller, special cylinder two-key combination latch and lock. "Rollaway" hardware is not sold except on our Harris Patented "Cellu-Seal" Insulator lined Garages.

The left hand door, looking at the inside of the Garage (see picture above) when closed fits in a pocket making the best weather tight equipment of its kind on the market. All is easily adjusted for height, and when properly adjusted, doors can be rolled to open or close with one finger.

# SPECIFICATIONS OF MATERIAL AND CONSTRUCTION

COVERING THE MANUFACTURE OF

## HARRIS PATENTED UNIT MADE GARAGES

PERMANENT CONSTRUCTION "CELLU-SEAL" Insulator Lined

**WE CANNOT** urge you too strongly to read every word of the following specifications. It gives you a clear and complete insight into the many exceptional qualities both in material and method of construction used in the manufacture of our Patented Buildings. It is a pleasure to be able to print such excellent specifications; there is nothing to hide and many good things to show and that is why we do not hesitate to give you full information on the subject.

### SPECIFICATIONS

**FOUNDATION SILLS** of our Garages are equivalent to practically a 4x8 timber when the wall sections are in place. They are made of strong, straight, selected No. 1 grade Southern Pine. They form a lock joint, holding the wall sections permanently in place, making it easy for one man to put the sections in place himself.

**CORNER POSTS:** Corner posts are interchangeable like the sections and when in place give a corner timber construction practically equivalent to a 4x5 timber. Our system eliminates special corner sections.

**OUTSIDE WALLS:** The outside walls consist of "sections" or panels made up in one, two and four foot widths. All wall sections are interchangeable. These "sections" or panels are made up as follows:

**SIDING:** Clear kiln-dried Oregon Fir Siding, tongued and grooved, beaded on the outside, and beaded or planed smoothly on the inside, applied vertically. Manufactured from three-quarter-inch stock finished five-eighths inch.

**"CELLU-SEAL" LINING:** Our exclusive product, "Cellu-Seal" is an insulating wallboard, consisting of two heavy layers of tough fibre paper (Mullen test 175 pounds to the square inch) with an inner layer of corrugated paper, and sealed by our own special machinery, giving thousands upon thousands of wonderful insulating dead air cells with a consequent efficient insulation against cold in winter and heat in summer. With this new type of lining a Harris Patented Garage will be warmer in severe cold weather than any single wall garage, and, of course, cooler in summer, to say nothing of the enhanced beauty in its paneled appearance. "CELLU-SEAL" Insulated Walls are absolutely wind-proof and nearly a quarter of an inch thicker than on garages prior to 1925.

**STUDDING:** The studding is No. 1 and better grade Southern Pine, surfaced four sides, average distance apart sixteen inches. They are used in pairs every four feet where bolted together, with an additional stud in between, making three studs to forty-eight inches of wall. The studding is two by three. Two by four is not necessary in our construction on account of the three interlocking cross braces, all of which are halved at joints, give more than the necessary strength and hold the sections square and true.

**CROSS BRACES:** There are three horizontal or cross braces of two by three inches and one 2x6 at the bottom of the section, which are secured to the studs by halved joints, nailed with cement-coated nails. The inside of the panels show a neat symmetrical distribution of framing.

**TOP WALL PLATES:** Fir and Yellow Pine built up equivalent to practically a four by six timber. This plate has a groove in it that drops right down over the siding on the wall sections and holds it in a vise-like grip, keeping the walls in alignment.

**ROOF TRUSSES:** Manufactured of No. 1 and better grade Yellow Pine, two by fours with one by six scientific braces, reinforced with iron straps and made so as to form a notch-lock that drops into the top wall plate and holds the entire building in a firm grip. These patented trusses not only make a roof much superior to any other on the market, but make it a simple matter for any amateur to erect and make a good job of it.

**ROOF SECTIONS:** Are manufactured of No. 1 quality Southern Pine Ship Lap. Beaded on the under side to give a neat and finished appearance. Roof sections are made so they will easily drop in place between the trusses, and have additional rafters on them to add still more strength.

**FRONT DOORS:** "No-Sag" "QUICK-LOCK" front doors are furnished with every garage. These doors are our own exclusive design and manufactured only by us. Guaranteed not to sag.

**ROLLAWAY SLIDING DOOR:** Brand new! Our own patented hardware. Best on market. They roll away—around on the inside—just out.

**SIDE DOORS:** Side door, when furnished, comes to you already in the section with hardware all on and you can place this section wherever it is most convenient to your individual requirements. The side door is either plain or glazed, depending upon the model of the garage you purchase.

**WINDOWS:** The new type windows furnished on Models "A," "C," are "SWING out" casement sash divided into five lights equipped with combination adjuster and lock. Opening size 28" x 25".

On Models "B," "D" and "G" we use our regular House windows, the size of which is 28"x46" overall. There are two sash to the windows, one above and one below, the one above being divided into six lights making it very attractive. Windows are equipped with special tension and anti-rattle springs, to permit raising and lowering window to any position. Sash lock and lift attached.

**PAINT:** Garages come to you painted, one good heavy coat of outside paint, stock color medium gray for the body, white trim and sash. Our stock color is such that it will take almost any finishing coat.

**ROOFING:** Roofing supplied is best quality Red or Green Slate surfaced Roofing. Guaranteed first quality standard weight and manufacture Roofing. Sufficient nails, cement and complete instructions are included with each roll, showing the proper way to apply the roofing. Individual, four-in-one Slab Shingles or roofing stamped like shingles can be had at an extra cost. Prices upon application.

**HEIGHT:** The height of wall to plate on all Garages is 8'.

Height overall on all models is as follows:

On Garages 9'-6" wide—height to highest point of roof, 10'- 7 1/2".  
On Garages 10'-6" wide—height to highest point of roof, 10'-10".  
On Garages 12'-6" wide—height to highest point of roof, 11'- 3 1/2".  
On Garages 16'-6" wide—height to highest point of roof, 12'- 2 1/2".  
On Garages 18'-6" wide—height to highest point of roof, 12'- 9".  
On Garages 20'-6" wide—height to highest point of roof, 13'- 3".

**EAVES OVERHANG:** In figuring the amount of space overall required for a Garage, including the overhang eaves, add 2 ft. to the width of the Garage, also 2 ft. to the length. For example, a 10'6"x16'6" Garage—the space needed will, approximately, be 12'6"x18'6".

**HARDWARE:** The hardware we furnish, consists of the following:

**CYLINDER LOCK:** Genuine 3-Key cylinder latch furnished for garages equipped with service door.

**HINGES:** Special fancy japanned 10" strap by 2 1/2"x7" butt, extra heavy T hinges with No. 14 japanned screws. Hinges are already applied to doors.

**DOOR HOLDERS:** The greatest convenience of the age. They hold the large doors in place, when open.

**DOOR HANDLES:** For each pair of auto doors and service door.

**ERECTION:** Garage prices given in this book include delivery within 35 miles of our factory and erection by our workmen according to specification on this page. Chestnut post foundation is included.

**FOUNDATION:** See page 27 of catalog for further details. Foundation must be level and square. This is imperative. Garage can be set directly on the earth, or cinders, or posts, or piers, of brick, stone or concrete, or concrete foundation walls, and when placing same bear in mind that the outside measurements of our foundation sills are the same as the size given for the Garage, for instance, if you buy a 12'-6"x16'6" Garage and build a concrete foundation, see that the outside of same is exactly 12'-6"x16'-6" and the sills of our building will then fit down upon it perfectly. The same holds good for piers or posts unless you want to have them extend out beyond the sills of the building.

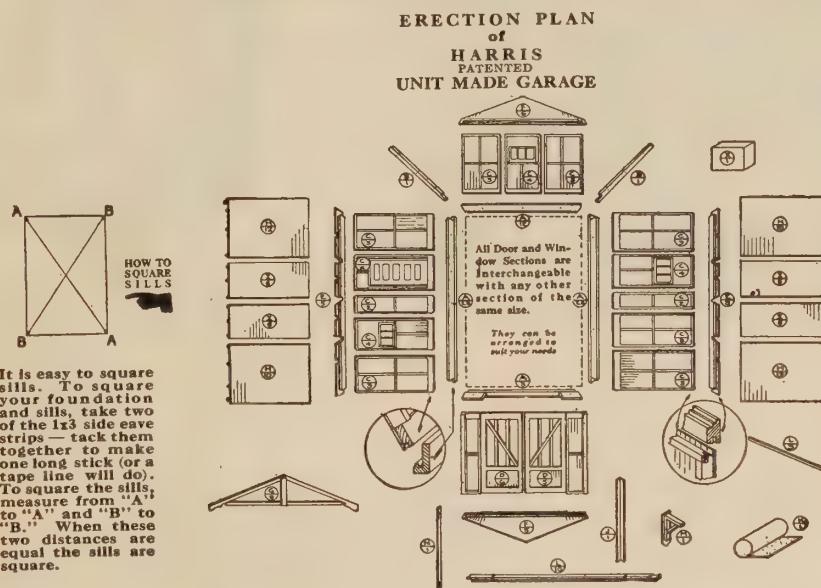

**SKIRTING:** No skirting charged for or furnished.

**PATENTS:** Various new and improved features of our buildings are patented—April 2nd, 1918, Sept. 3rd, 1918, March 22nd, 1921, July 18th, 1922, other patents pending. The right is reserved to make changes in construction and material as improvements may necessitate.

# A Reproduction of the Complete and Easily Understood Plans Furnished With Every Garage

*You Can't Go Wrong. This Shows How Simple  
It Is to Erect Any Harris Patented Garage*

HARRIS BROTHERS CO.,  
500 N. WABASH AVENUE  
CHICAGO

## Foundation Plans for Harris Patented Garages FURNISHED ON RECEIPT OF ORDER

## POST FOUNDATIONS

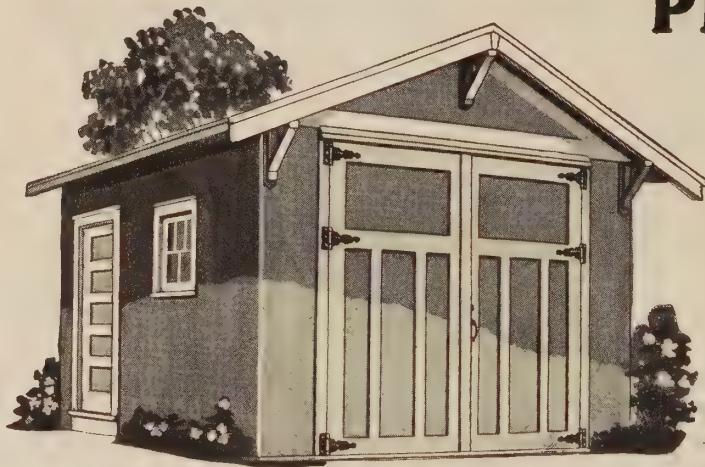

## Post Foundations

**I**N BUILDING concrete floors, the plan shown above should be adhered to carefully. We have found the most practical and economical method of fastening the garage sills to the concrete floor is by means of iron straps, as illustrated. Be sure and see that the outside measurement of your foundation is the same size as the garage. As you will note above we are taking the 12'6"x18'6" as an example and the outside measurement of the concrete floor is also 12'6"x18'6". The iron strap anchors, if placed according to the measurements given, will come flush with the inside of the garage sills and can be spiked or fastened to the sills with lag screws.

When the garage is set on cedar posts or piers, it is recommended that 6" chestnut posts be used or 6" concrete or stone piers. These piers should be set according to the plan above. For example on the 12'6"x18'6" building, the outside measurement of the piers should be 12'6"x18'6" and to be spaced as shown above. Sills of the garage can be spiked to the posts or anchored with iron straps. Where the ground is level it is not necessary that the posts be set more than 2 or 2 1/2 feet into the ground.

# HARRIS, *patented* GARAGES offer PERMANENT

Model "A" Gable Roof

The preceding pages explained in detail the superior method of Harris Patented Construction as well as the excellent grades of materials used.

The actual photo above is typical of the thousands who have purchased this model — no unnecessary frills about this building, but still far more attractive than most similar buildings of the old fashioned saw and hammer type. Harris garages are complete when they come to you. No carpenter work—no muss around your lot.

*Furnished With*

*Three new type swing-out casement sash, one service door and choice of "Quicklock" swinging doors or easy "Rollaway" doors.*

Model "C" Hip Roof

If you have a "hip roof" on your home, the garage illustrated above will match up very nicely.

By careful experimenting, we have developed these hip roof garages combining our patented notch-lock truss and all the other features of our construction. Every garage is guaranteed that there can be no spreading of walls or sagging of roof, regardless of snow-load.

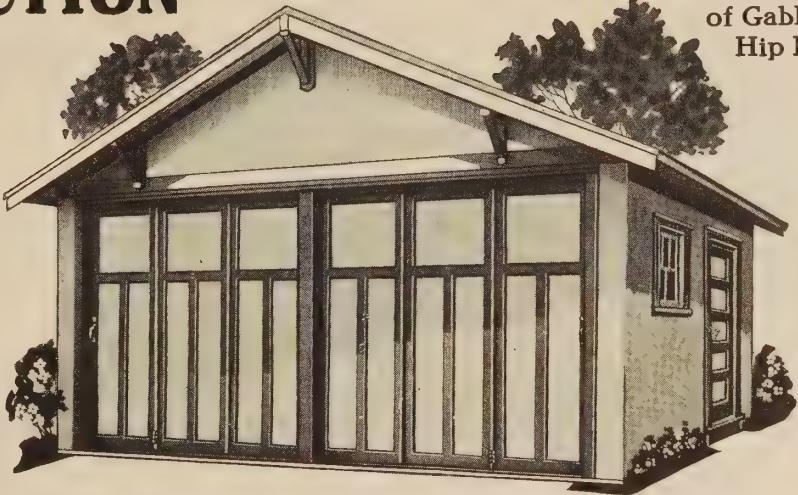

*Furnished With*

*Three new type swing-out casement sash, one service door, and choice of "Quicklock" swinging doors or easy "Rollaway" doors.*

## CONSTRUCTION

Two Car Garages—  
Your Choice  
of Gable or  
Hip Roof

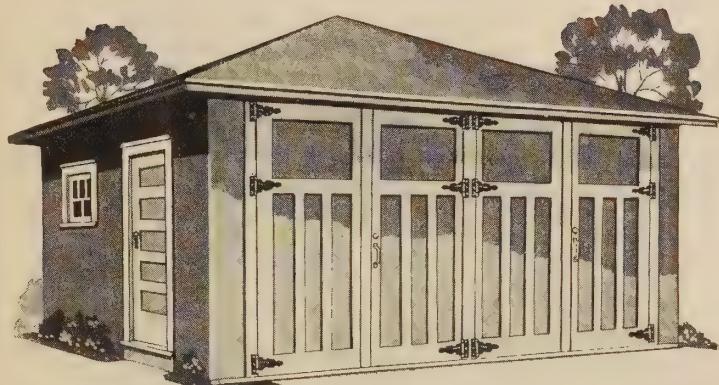

Model "A" Gable Roof

If you have sufficient room on your lot for a two-car garage, you certainly are overlooking the best investment if you don't buy one—the rental from the other side will pay for the building.

Remember, in our patented unit-method construction the windows and service door may be placed wherever you want them. You can be proud of this building—it will be an asset to your property.

**Furnished With**

*Four new type swing-out casement sash, one service door and two sets of auto doors, choice of "Quicklock" swinging doors or easy "Rollaway" doors.*

Model "C" Hip Roof

Built on your  
lot, model "A"  
2-car garage,  
size 16'6"x18'6"

**\$343**

Our volume production with labor saving machinery permits us to give you this "hip roof" style of garage without extra cost. This type building usually costs at least 10% more.

A suggestion: If you want to "doll" up this building at a small cost, we can furnish flower boxes, hoods, trellis and make it a very attractive building.

**Furnished With**

*Four new type swing-out casement sash, one service door, and two sets of auto doors, choice of "Quicklock" swinging doors or "Roll-away" sliding doors.*

**"DE LUXE" Model "D" Hip Roof**

Here is another type of "DeLuxe" garage. This is the Model "D", identical in construction with all other Harris Patented Garages, in all details.

It is indeed difficult to imagine that this is a sectional building and that anyone can make just as good a job of it — the reason is simple — it is the result of the carefully thought-out Patented Construction — no joints show — wind, weather and fool proof, made of best materials, not only to look well, but to last long.

**Furnished With**

*Two Colonial windows, one Colonial glazed service door, choice of glazed "Quicklock" swinging doors or glazed "Rollaway" doors.*

## "De Luxe" Model "B" Gable Roof

Our files show thousands who have purchased this "De Luxe" type of garage after careful search for a building that would not detract from the beauty of their home.

A most pleasing combination of colonial style windows, doors and other decorations that set this building out from the ordinary "slapped-up" garage.

### *Furnished With*

*Three Colonial windows, one Colonial service door and two sets of auto doors, choice of glazed "Quicklock" swinging doors or glazed "Rollaway" doors.*

Built on your lot,  
model "B" two-car  
garage, size 16'6" by 18'6."

**\$373**

## "De Luxe" Model "D" Hip Roof

Your "De Luxe" Model "D" garage will be equally handsome, as this one erected on the back lot of a \$50,000 residence in Chicago.

This type of garage is identical in type as the Model "B" illustrated with the exception of the roof being the "hip roof" style.

## Two and Three Car Garages Without Center Post Can Be Furnished in Model "A" or "B" Gable Roof Only

No Center Post Garage With "Rollaway" Doors

These garages without center posts are furnished with Rollaway Doors and only in Models "A" and "B".

Here is our newest and latest type of garage. TWO AND THREE CAR garages WITHOUT center posts, giving the greatest possible clear space door opening, easy to drive in and easy to drive out.

With the development of our patented Rollaway hardware we have now tested out and placed on the market no center posts garages that can be had in two and three car capacity.

These garages are furnished only in gable roof construction as illustrated to the left. This gable is scientifically constructed with extraordinary bracing in the back of it so that there will be no sagging and will hold the doors in perfect order. This is guaranteed by us.

Think of this convenience, especially to those who are crowded for ground space and sometimes must confine themselves to 16 feet 6 inch widths for two cars and with this no center posts construction it will be an easy matter to drive two cars in and out in a width of this size. In 18 feet 6 inch width without center posts there is of course still more room and if absolutely necessary three fairly small size cars can be housed in this width. For greater convenience we recommend the 20 feet 6 inch width and 18 feet 6 inch depth, or 22 feet 6 inch and 18 feet 6 inch for customers who have the necessary ground space and want to house three cars or two cars with lots of additional room for garden tools and such other things that are usually kept in the garage.

Following is width of openings of our various size no center post garages:

Width of Garage	Width of Clear Opening	Number of Doors	Extra Cost
16 feet 6 inches	15 feet	6	\$10.00
18 feet 6 inches	16 feet	6	10.00
20 feet 6 inches	18 feet	7	15.00

\$5.00 TO BE ADDED TO ERECTION ON NO CENTER POST GARAGES.

# “Garage” Accessories

## Blinds and Flower Boxes

**BLINDS**—These blinds are made up of Clear White Pine. Painted one coat of white, including Gravity Blind Hinges and Catch.

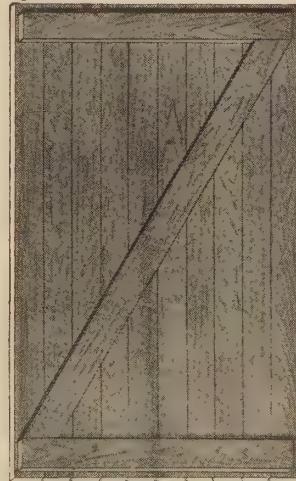

**38-AN-142.** For Colonial Windows, price per pair.....\$4.50

**FLOWER BOX**—Size 3' 6" wide complete with brackets and painted one good coat of white paint. Price,

**38-AN-144.** .....\$1.25

## Winter Shutters

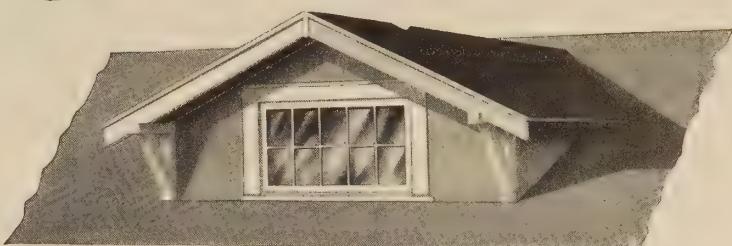

You can leave your cottage at the end of the season without worrying about anybody breaking the windows, or getting in. These winter shutters are made up of No. 1 Yellow Pine Beaded Shiplap boards, strongly reinforced. They fit right into the opening and can be nailed in place or fastened with hooks from the inside. Painted Gray on the outside. No hardware included.

For Colonial Windows.....\$1.50

For French Windows.....1.75

For Half-Size Windows.....90

For Doors.....2.75

## Dormers

A long expanse of roof can be broken up and the appearance of a cottage can be improved by dormer as illustrated here. This dormer is not only beautifying but useful as well. It can be used as a ventilator—the window is made to slide up and can be operated by a cord drawn through to the room below. The roof of the building can be cut out to permit the air to circulate through the attic. Furnished complete in sections ready to assemble, painted stock color—gray and white trim. Sufficient slate surfaced roofing also included. **DORMER 38-AN-148** .....\$35.00

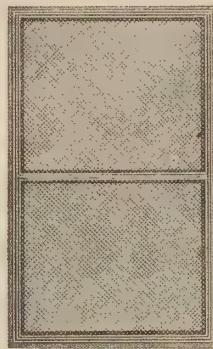

## Window or Door Hood

This window, or door canopy, sometimes called “hood,” is made up ready to set in place complete with brackets. 3' 10" wide, painted white. It makes an ideal protection against rain and snow.

**38-AN-145** .....60c

## Window Screens

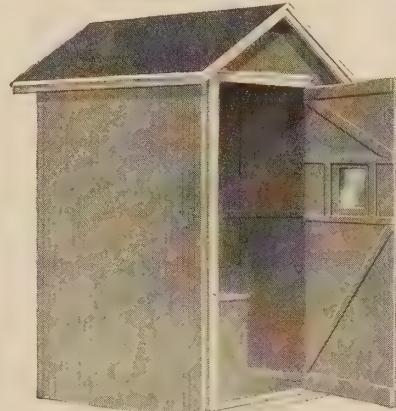

**Screens for Colonial Windows**  
Made of galvanized wire, painted white, for Colonial Windows, size 2' 4 $\frac{1}{2}$ " x 3' 11", each.....\$2.30

**French Windows—Screens**  
Galvanized wire, vertical center rail, painted white. For French Windows. Size 2' 8 $\frac{1}{2}$ " x 3' 11". Each.....\$2.55

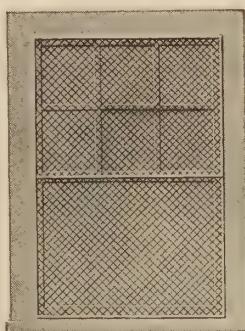

**Half-Size Screens and Half Casement Screens**  
Galvanized wire, made to fit lower half of windows and for bath rooms, closets, etc. Size 2' 4 $\frac{1}{2}$ " x 2' 4". Each.....\$1.85

**Screen Doors**  
See building material catalog giving illustrations and prices of various types of screen doors.

**Harris Patented Bath House and Outhouse**  
“CELLU-SEAL” Insulator Lined

## Wire Guards for Garage Windows

### For Colonial Windows

For Models “B,” “D,” and “G” Garage windows or for houses.

**38-AN-147** .....\$3.95

Where plumbing accommodations are not yet available Outhouses will solve the problem. These handy buildings are made up of regular units and can be assembled in an hour. Price includes floor and large and small seat. For Bath Houses we furnish one plain seat 12" deep and 4" wide instead of the large and small seat. Painted regular color gray and white trim. **HARRIS Patented Outhouse or Bath House.**

**38-AN-149** .....\$42.50

### Gas Burning Water Heater

No. 5-AN-2134. Fast heating efficient double copper coil water-heater with cast iron jacket. Hinged door, Japanned finish. 3 in. full connection,  $\frac{1}{2}$  in. gas supply,  $\frac{3}{4}$  in. water supply. Size 18 ins. high, 7 in. diameter with 18 ft. of  $\frac{3}{4}$  in. copper tubing, each.....\$7.00

No. 5-AN-2136. 22 ins. high, 8 in. diameter with 25 feet  $\frac{3}{4}$  in. tubing, each.....\$9.75

## Harris Septic Sewage Disposal Tanks

Sectional view showing simplicity and effectiveness of Harris Septic Tanks.

Safe - Effectual - Inexpensive. Sanitary - Odorless - Protects your water supply. Used wherever running water is available. Anybody can install one.

The HARRIS SEPTIC TANK is adapted to all uses, city or rural where running water is available. Ideal for homes, hotels, summer resorts, etc. By the natural process of bacterial action it provides a safe, yet effectual and inexpensive method of sewage disposal, as well as a positive protection of your water supply. HARRIS SEPTIC TANKS are easy to install, no skilled labor being required. Full instructions for installation furnished with each tank. After installation they require no further attention whatever.

HARRIS SEPTIC TANKS are made from the purest Copper-bearing iron obtainable. Ten to fourteen gauge metal is used, the gauge of the metal being increased as the capacity of the tank increases. All seams are carefully welded by experts, and every tank is given a thorough inspection before leaving the factory.

All surfaces are covered with several coats of tested Mineral Oil Preservative, applied under intense heat, protecting the tanks indefinitely against any corrosive action.

The No. 301 HARRIS SEPTIC TANK is the best family size tank.

# General Plumbing Accessories

## Sink Plugs

5-AN-1729.

Furnished complete as illustrated, nickel-plated. Each..... 25c

## Sink Brackets

5-AN-1723.

Black japanned steel sink bracket of neat design, strong and substantial. For sinks 18 ins. and 16 ins. per pair..... 60c  
For sinks 20 ins. and larger, per pair..... 75c

## Force Cups

5-AN-3033. Used to force obstruction from closets, lavatories and sinks. Place the rubber cup over the opening and press down; this will form a suction and remove almost any obstruction, saving a plumber's bill which will easily pay for the force cup many times over. Without handle. Price, each..... 35c

## Low Tank Closet Valves

5-AN-1300. High grade pure rubber low tank closet valves. Choice of three sizes. Replace your leaky valve and save the water you are now wasting. They are quickly and easily replaced. Shipping weight about 6 ounces.

2 inch. Price..... 20c  
2½ inch. Price..... 24c  
2¾ inch. Price..... 30c

## Sink Bolts

5-AN-1733. Screw head bolts for cast iron sinks. Each..... 2c

## Lead Bends

Standard Grades

5-AN-2831. 5½x10 inch, each. \$1.50  
5-AN-2837. 5½x12 inch, each. 1.80  
5-AN-2837 ½x10 inch, each 2.15

## Cast Iron Closet Bends

5-AN-2839. Adjustable Flange Closet Bend. Size, 4x15 inches. Tapped both sides for 1½ inch iron pipe. Shipping weight about 18 lbs. Price..... \$1.30  
5-AN-2839 ¾ Plain Bend, 4x15 inches not tapped. Price..... \$1.05

5-AN-2839. Adjustable Flange Closet Bend. Size, 4x15 inches. Tapped both sides for 1½ inch iron pipe. Shipping weight about 18 lbs. Price..... \$1.30  
5-AN-2839 ¾ Plain Bend, 4x15 inches not tapped. Price..... \$1.05

## Lead and Nickel-Plated Traps

### Lead "S" Trap

Short Lead "S" Traps with iron pipe connections on outlet end.

5-AN-2857. 1¼ ins. Price, each..... \$1.35

5-AN-2859. 1½ ins. Price, each..... \$1.75

### Nickel-Plated Traps

5-AN-2704. Nickel-Plated New York Regulation Traps.

1½x1½ inch, each..... \$1.10  
1½x1½ inch, each..... 1.30

### Lead "S" Trap

Short Lead "S" Traps, plain ends in two standard sizes.

5-AN-2851. 1¼ ins. Each..... 85c

5-AN-2853. 1½ ins. Each..... \$1.05

## Sink Strainers

5-AN-1727.

Nickel-plated sink strainers. Each..... 15c

## Sink Couplings

Illustration at left shows sink couplings for lead pipe connections.

Illustration at right shows sink couplings for iron pipe connections.

5-AN-1737. Cast iron couplings for lead pipe connections..... 6c

5-AN-2739. Cast iron couplings for 1½ inch and 1½ inch iron pipe connections. Each..... 20c

## Metal Sink Plug

5-AN-3143. Heavy Nickel-Plated Brass Sink Plug adjustable to fit any sink.

Tail piece 4½ inches long. May be used as a slip connection with trap No. 5-AN-2704 above.

Price, each..... 60c

## Lavatory Plug

5-AN-2856. Nickel-plated P. O. Lavatory plugs with rubber stopper, tailpiece 4½ inches long. Will fit any lavatory. Each..... 50c

## Soldering Bushing

5-AN-3198. Soldered to lead pipe to make iron pipe connections. Size, 1½ in. Price..... 20c

5-AN-3199. Size, 1½ inch. Price. 24c

## Brass Ferrules

Used in connecting lead waste pipe to soil pipe.

5-AN-2843. 4x4 ins. Each..... 50c

## Brass Soldering Union

5-AN-2905. Used to connect lead with iron.

Size, inches..... ¾ ½ ¾ 1  
Price, each..... 15c 20c 25c 33c

Size, inches..... 1½ 1½ 2  
Price, each..... 43c 49c 60c

## Continuous Waste

5-AN-2840. Continuous Waste for combination sink and laundry tub finished in dull nickel-plate, complete as shown.

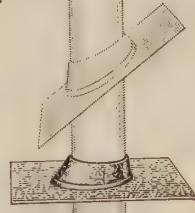

With 1½ in. x 1½ in. trap..... \$5.25

With 2 in. x 1½ in. trap..... 6.50

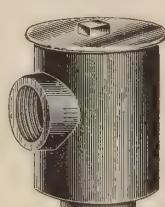

## Roof Flanges Adjustable

5-AN-1091. 4 in. galvanized adjustable roof flanges, each. \$1.20

5-AN-1091½. 4 inch copper adjustable roof flanges, each. \$2.00

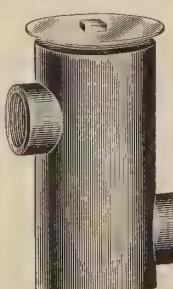

## Iron and Lead Traps

Cast Iron Bath Traps

5-AN-2811. Complete with nickel-plated covers for sinks, laundry tubs, bath tubs, etc. Tapped sides and bottom for 1½ in. iron pipe.

4x5x1½ ins. Price..... 95c

5-AN-1532. Size, 4x8 inches. Tapped both sides for 1½ in. pipe. Ship. wt. about 15½ lbs. 4x9 inches. Price..... \$1.15

Lead Drum Traps  
5-AN-2815. With nickel-plated brass trap screw, size 4x9 inches. Each..... \$3.25

# Stop Cocks and Plumbing Accessories

## Indexed Compression Double Bath Cock

**\$2 75**

Made of brass, nickel plated; china index lever handles. The large chamber at back thoroughly mixes water.

**5-AN-3104.** Price with lead pipe, tall pieces. **\$2.75**

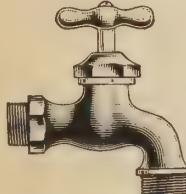

**5-AN-3106.** Price with iron pipe, tall pieces. **\$3.25**

## Basin Cock

Handsome, serviceable heavily nickel-plated Basin Cock. The body and spout are cast solid in one piece. White porcelain platemarked "Hot" or "Cold." If not ordered in pairs, be sure and state index desired. **5-AN-3125.** Price with iron pipe, tall piece, each. **\$1.00**

## Compression Plain Bibbs

**90c**

Threaded for Iron Pipe nickel-plated.

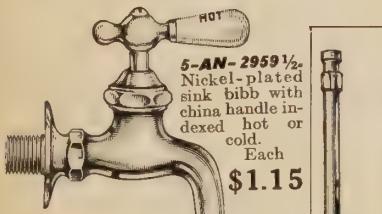

**5-AN-2955.** Size,  $\frac{1}{2}$ -in. **90c**

## Basin Cocks

**5-AN-3125 1/2.** Nickel-plated basin cocks with all China handles indexed hot or cold, ea. **\$1.40**

## Sink Bibb

**5-AN-2959 1/2.** Nickel-plated sink bibb with china handle indexed hot or cold. Each

**\$1.15**

## Basin Supplies

**5-AN-3173 1/2.** Nickel-plated basin supplies with nickel-plated angle stops with wheel handle.

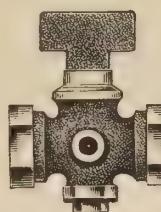

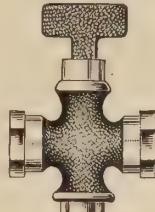

Price, per pair. **\$3.00**

## Boiler Cock

**5-AN-2129.** Boiler drain cock. Made of solid brass in rough finish. Threaded for standard hose couplings,  $\frac{1}{2}$  inch connection to range of heating boiler.

Price, each. **40c**

## Compression Stop Cocks

**"T" Handle Brass Stop for Iron Pipe.**

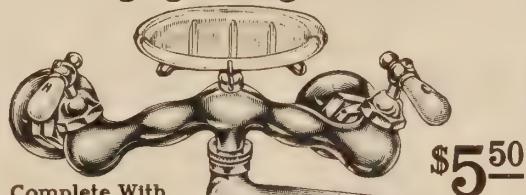

**5-AN-3011.** Each Size,  $\frac{1}{2}$  inch. **\$0.53**  
Size,  $\frac{3}{4}$  inch. **.75**  
Size, 1 inch. **1.32**  
Size,  $1\frac{1}{4}$  inch. **2.25**  
Size,  $1\frac{1}{2}$  inch. **3.75**

**5-AN-3012.** Improved automatic compression waste valve. First or last half turn of handle closes or opens flow. Cannot waste under full compression. Threaded for iron pipe. Size,  $\frac{1}{2}$  inch. **\$0.65**  
Size,  $\frac{3}{4}$  inch. **.77**  
Size, 1 inch. **1.35**  
Size,  $1\frac{1}{4}$  inch. **2.30**  
Size, 1  $\frac{1}{2}$  inch. **3.80**

**"T" Handle Brass Stop and Waste for Iron Pipe.**

**5-AN-3013.** Each Size,  $\frac{1}{2}$  inch. **\$0.55**  
Size,  $\frac{3}{4}$  inch. **.77**  
Size, 1 inch. **1.35**  
Size,  $1\frac{1}{4}$  inch. **2.30**  
Size, 1  $\frac{1}{2}$  inch. **3.80**

## Swinging Mixing Faucets

Complete With Soap Dish

**\$5.50**

## Swinging Mixing Sink Faucet

**5-AN-1603.** Latest improved swinging mixing faucet for kitchen sinks. Made of heavy brass, highly nickel-plated. Fitted with white China handles indexed for hot and cold water. The long spout mixes hot and cold water to just the right temperature and distributes the flow to all parts of the sink. White porcelain China soap dish supported by neat nickel-plated bracket attached to top of faucet. Designed to fit standard openings in kitchen sinks. Made with flange and threaded for  $\frac{1}{2}$  inch pipe connections. Price, each. **\$5.50**

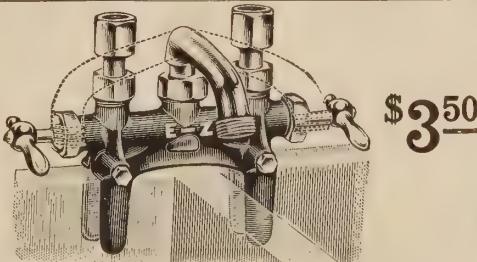

White China Indexed Handles

**\$5.00**

## Swinging Mixing Sink Faucet

**5-AN-1604.** Mixing faucet with swinging spout for kitchen sinks. Designed to fit standard openings of all sinks. White China handles indexed for hot and cold water. Long spout mixes hot and cold water to the right temperature and enables you to distribute the flow practically to any part of the sink. Made with flange and threaded for  $\frac{1}{2}$  inch iron pipe connections. Made of brass highly nickel-plated. Price, each. **\$5.00**

Saves Time and Fittings

**\$3.50**

## Swinging Mixing Laundry Tub Faucet

**5-AN-1605.** Improved laundry tub faucet. Quickly and easily connected to any laundry tub; saves more than half of the time required for installation and more than its cost in fittings alone. The long spout mixes water to the right temperature and enables you to distribute the flow to both compartments of your laundry tub. Made of brass highly nickel-plated. Fitted with adjustable lock nuts threaded for iron pipe connections. Price, each. **\$3.50**

## Lavatory "S" Traps to Floor

**1 1/4 and 1 1/2 inch**

**5-AN-3157.**  $1\frac{1}{4}$  inch nickel-plated "S" trap. For lead pipe connection. Price, each **\$2.50**

**5-AN-3158.**  $1\frac{1}{4}$ -inch nickel-plated "S" trap. For iron pipe connection. Price each. **\$3.00**

## Basin Supply Pipes

**5-AN-3171.** Nickel plated Basin Supply Pipes to wall, plain, made of heavy  $\frac{3}{8}$  in. brass tubing fitted with coupling to fit basin cock, nickel plated flanges. Price, per pair. **\$2.00**

**\$2 00**

## Straight Basin Supply Pipes

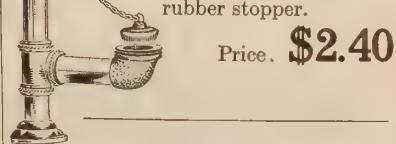

**5-AN-3173.** Straight basin supplies made of heavy tubing. Size  $\frac{3}{8}$  inch, fitted with nickel-plated coupling threaded to fit basin cocks, furnished with nickel plated floor flanges. Price, per pair. **\$2.00**

## Plain Compression Laundry Bibb

**5-AN-3501.** Polished brass. For  $\frac{1}{2}$ -inch iron pipe. Shipping weight, about 8 oz. Price. **45c**

## Connected Bath Waste and Overflow

**5-AN-3131.** Heavy nickel-plated brass tubing with nuts, ell and shoe of cast brass. Furnished with adjustable tee and nickel plated floor flange; nickel-plated chain and rubber stopper. Price. **\$2.40**

## Bath Tub Supply Pipes

**5-AN-3167.** Nickel-plated straight bath supply pipes, heavy  $\frac{1}{2}$  in. tubing with coupling, threaded to connect with tall pieces on bath cock, complete with floor flanges. Price, per pair. **\$2.00**

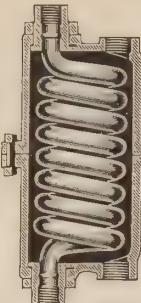

**Sill Cock**

**5-AN-3035.** Compression sill cock with  $\frac{3}{8}$  inch threaded for standard hose coupling and threaded for connection to  $\frac{1}{2}$  inch iron pipe. Made of brass in rough finish with iron wheel. Price, each. **75c**

# Plumbing-Heating Accessories

## Domestic Water Heaters

**5-AN-986.** Domestic Water Heater operates on any steam or vapor heating system, giving a constant flow of hot water for domestic use.

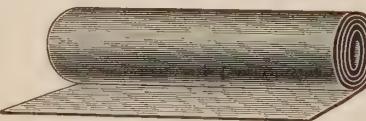

Size suitable for 30 or 40 gal. boiler, each. **\$3.50**

Size suitable for 52 gal. boiler, each. **\$8.00**

**17-AN-984.** An efficient water heater especially made to be used in any standard furnace. Made of finest smooth gray cast iron. Convenient clean-out plug enables you to remove sediment. Two openings for 1 inch pipe. Easily installed by removing parts covering these openings. Efficiently used in connection with any 40 gallon range boiler. Price, each. **\$2.25**

## Sheet Lead

**5-AN-2805.** Sheets are 24 inches wide. Thickness, inches.  $\frac{1}{2}$   $\frac{1}{4}$   $\frac{1}{8}$ . Weight, per square foot. .2 lbs. 4 lbs. Price, per square foot. **44c** **80c**

## Spun Oakum

Used for calking soil pipe and fittings. Comes in 50 lb. bales.

**5-AN-2907.** Price, per full bale. **\$5.50**

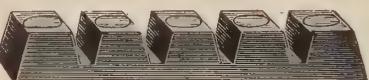

**5-AN-2908.** In less than full bales, per lb. **12c**

## Calking Chisel

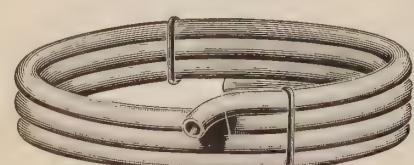

**5-AN-2923.** Plumbers' calking chisel, made of special tool steel. Price, each. **25c**

## Pig Lead for Calking

**5-AN-159.** Pig lead for calking and all plumbing work. Per pound. **12c**

## Lead Pipe

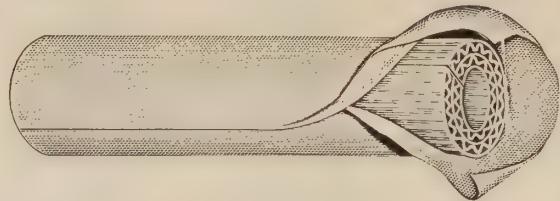

We will furnish this pipe cut in lengths you may require. Prices are based on present market conditions. We will offer Lead Pipe subject to market changes.

**5-AN-2801.** For Waste Pipe: Diameter, inch.  $1\frac{1}{4}$   $1\frac{1}{2}$  2 4 Weight, per foot. 2 lb. 3 lb. 4 lb. 5 lb. Price, per foot. **36c** **54c**

**5-AN-2803.** Strong Lead Pipe. Diameter, inches.  $\frac{5}{8}$   $\frac{3}{4}$  Weight, per foot.  $2\frac{1}{2}$  lb. 3 lb. Price, per foot. **46c** **55c**

## Asbestos Air Cell Pipe Covering

**21-AN-206.** Suitable for steam or hot water heating plant. Is a first class insulator. It is  $\frac{1}{2}$  inch thick, made up of layers of Asbestos with small air spaces between. These air spaces very materially increase the efficiency of the covering. It is light, thus reducing freight charges. Mechanically stronger, so less liable to breakage, and we believe it is in every way equal to the Asbestos Moulded Pipe Covering. Sold in sections of 3 feet. Easily applied. Metal bands for each section.

# Black Wrought Steel Pipe Galvanized

## Black and Galvanized Pipe

**6-AN-1.** Brand new black and galvanized wrought steel pipe, fully tested and guaranteed. Best quality made, easily cut and threaded. Comes in standard full lengths ranging from 18 to 21 feet; each length threaded on both ends, fitted with coupling on one end. Prices below are for full lengths only as it comes from the mill and are based on latest market prices. All prices shown are for quantities up to 1,000 feet. Ask for special prices on larger quantities. Freight prepaid prices quoted on request.

Size of pipe determined by its inside diameter.

Size 2"	55c

#### Wrought Iron Long Screw

21-AN-126

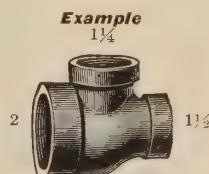

With Coupling and Lockout, Faced.  
Galvanized  
Size, 1 1/2" x 5 1/2" long. Price..... 96c  
Size, 2" x 6" long. Price..... \$1.60

### HOW TO ORDER

#### Reducing Tees and Crosses

##### Reducing Tees

1st. Always give end or run openings. Then side openings.

Order should read: "2x1 1/2x1 1/4."

##### Reducing Crosses

Always mention all openings. Reading straight across, then up and down.

Order should read: "2x2x1x1."

### How To Measure

#### Sizes for Cast Iron Threaded Drainage Fittings

NOTICE.—The sizes given for fittings refer to the size of the pipe on which fittings are to be used. Carefully measure the inside of the pipe. NOT the coupling, and order by this size.

### 90 Degree Drainage Elbow

# PIPE FITTINGS

## For Water & Gas Lines—Plumbing & Heating Systems

### Cast Iron Fittings

For Standard Wrought Iron Pipe are made of the best grade of material, carefully tapped, inspected before shipment, and guaranteed with uniform and perfect threads, suitable for a working pressure up to 125 lbs.; used on power plants, low pressure steam and hot water plants. In ordering fittings be sure and give the inside measurements of the pipe you will use the fittings with, as all pipe is listed by inside measurement only and fittings correspond. Give size and price when ordering. Sizes not listed, furnished on application.

### Malleable Iron Fittings

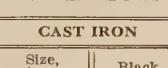

For Standard Wrought Iron Pipe are made of the best grade of malleable iron, great care being used in the selection of material and their manufacture; all fittings are inspected and tested before shipment, guaranteed water, air and gas tight. Give size and price when ordering.

# Perfection Round Sectional Heating Boilers

## Most Efficient Round Design

This sectional view of the interior of the boiler shows the deep fire pot entirely surrounded by water, insuring quick circulation. All parts are carefully tested and must fit perfectly before boilers are shipped from our factory.

## For Hot Water and Steam Heating Plants

*Burn hard coal, soft coal, wood, coke, or any fuel with utmost satisfaction*

PERFECTION sectional steam and hot water boilers show a decided improvement in "Round Type Boiler Construction." When designing Perfection Boilers, our engineers worked with one idea—to produce the most efficient and economically operated heating boiler possible. Following the designs of our engineers these boilers are carefully made from the best grade of gray cast iron, smoothly finished; all sections and parts fitting perfectly.

We call your special attention to the construction of the fire pot. The cast iron pins on the side of the fire pot serve a double purpose. They hold the ashes and dead fire from the fire pot and, because they project into the fire, heat quickly and increase the circulation in your heating system.

Although Perfection Boilers embody all latest improvements and are sold under a guarantee of absolute satisfaction, you will find the prices on these boilers exceptionally low.

### Important Features

Smooth, perfect fitting cast sections.

Deep fire pot and long fire travel gets the heat.

Greatest possible heating surface.

Rocker type clinker cutting grate bars.

Large size feed doors.

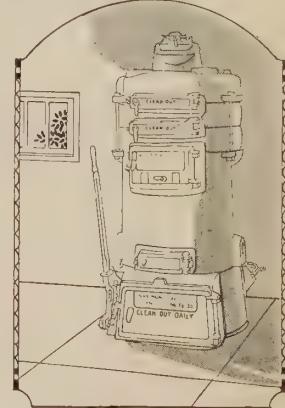

Deep, roomy ashpit.

Ease of operation and cleaning.

Rapid circulation.

Perfect fitting parts.

Shipments from factory in Eastern Michigan or Chicago.

Hot Water Boiler

### Prices of Perfection Round Sectional Steam and Hot Water Boilers

Prices of steam boilers include a complete set of steam trimmings. Prices of hot water boilers are for boilers without trimmings.

# Perfection Square Sectional Heating Boilers

## Encased in Heavily Insulated Attractively Designed Steel Jacket

Harris Perfection square sectional Jacketed heating boilers are encased in an attractive annealed steel jacket which is heavily insulated with asbestos. This double protection retains all the heat within the boiler, increases its efficiency, gives better heat circulation and assures the best performance from your heating system.

The attractive design and finish of a Steel Jacketed boiler will greatly improve the appearance of your basement.

### This Boiler will be your choice If Boiler Perfection Counts

Perfection square sectional, steam and hot water home heating boilers as they stand today are the result of constant experimenting, improving and tests for over 30 years.

Sections are smoothly and evenly cast in one piece from best gray iron carefully tested for strength and endurance.

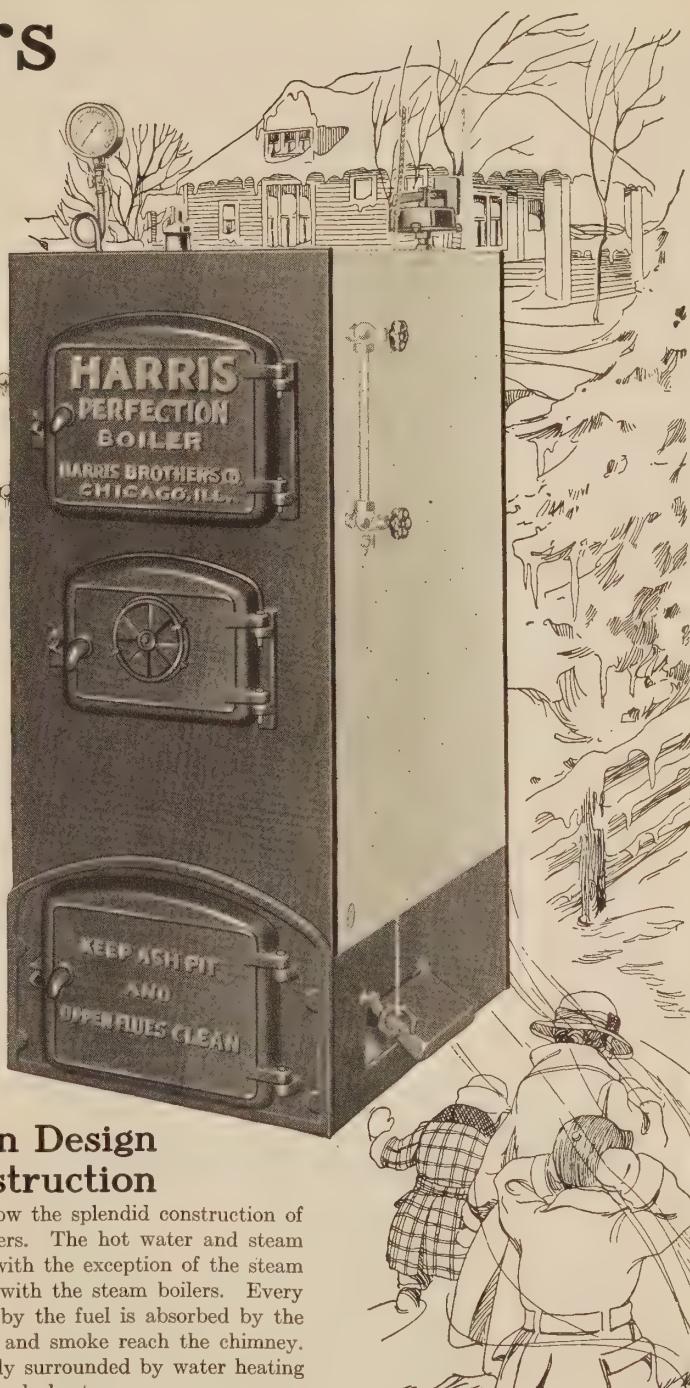

Maximum heating surface and long smoke travel insure utmost heat from least fuel. Note: The entire firepot is surrounded by water.

The "V" shaped construction of castings—the straight self cleaning flue passages—the rocker type clinker cutting grate bars and the ability of these boilers to burn wood, coke, hard coal, soft coal or any fuel giving greatest efficiency at all times make Perfection Boilers one of the most satisfactory on the market.

Perfection Boiler without Jacket

Greater Efficiency  
Self Cleaning Flues  
Quick Circulation  
Improved Fire Pot  
Burns any Fuel  
Clinker Cutting  
Grate Bars

### Perfect in Design and Construction

The pictures on this page show the splendid construction of Perfection square sectional boilers. The hot water and steam boilers are of the same design with the exception of the steam trimmings which are furnished with the steam boilers. Every possible unit of heat produced by the fuel is absorbed by the water before the burning gases and smoke reach the chimney. The extra deep firepot is entirely surrounded by water heating passages which insures quick, steady heat.

### Prices and Specifications of Perfection Heating Boilers

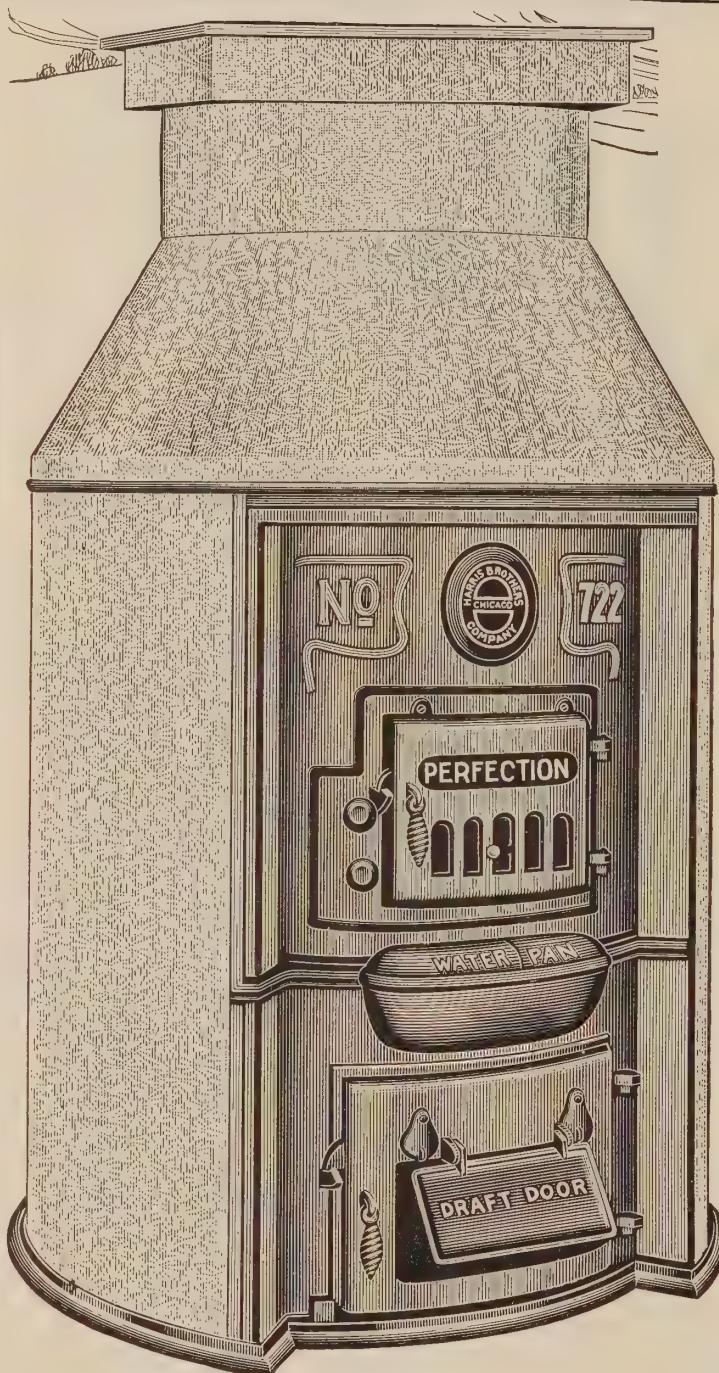

Prices of steam boilers include a complete set of steam trimmings. Prices of hot water boilers are for boilers without trimmings.

# Perfection Re-circulating Double Casing Pipeless Furnace

Read How the  
Re-circulating Feature  
Cuts Your Fuel Bill!

## One Register System

The heated air rises through the center part of the register and circulates through doorways to all rooms, continuing to rise and travel while heated, then falling and returning to the furnace. In this way an almost perfect circulation is continually maintained.

Good circulation is absolutely necessary to heat all the rooms in your home with a Warm Air Pipeless Furnace. To supply heat through one register in one room with no provisions to keep the air circulating is not sufficient. The air rising from the furnace will retain its velocity while it is hot, but as it cools, begins to fall and will return to the cold air intake on the outer part of the floor register.

The Harris Re-circulating Pipeless System with its cold air intake returning to the furnace heats all of the rooms quickly and evenly in the coldest weather and in re-circulating the air from the rooms less heat is required and less fuel needed to retain the steady even heat. This continuous circulation of air in all rooms mixing with the fresh air which comes into any house through doors and windows is a healthful advantage that should not be overlooked.

A particular advantage of Harris Re-circulating Furnaces is the unusually large cold air return. The outer casing being placed 8 inches from the inner casing allows a quick, active return of the cold air from the rooms above which increases circulation and gives a constant flow of warm air through your living rooms.

## Built for Long Service!

"Harris" Re-circulating Double Casing Pipeless Furnaces are built to give lifelong service. Made entirely of cast-iron with double casing made of heavy galvanized iron. The fire pot is made in two sections with deep corrugations. The triangular grate and all parts coming in direct contact with the fire are made of finest heavy cast-iron. The ash pit is large and deep to prevent damage to the grate from accumulated ashes. Extra large door to ash pit and extra large fuel door. Large water pan. Cast-iron parts are smooth and nicely finished. The galvanized casing is securely fitted and perfectly joined.

# Perfection "NEW-ART" Radiation

The Very Latest in Radiators  
bring new beauty and  
added Heating efficiency

The Perfection "New-Art" Radiator is the very latest achievement in modern heating, bringing new beauty and new heating efficiency to the home. The open tube design provides unusually free circulation both inside and outside. Full rated surface and yet occupies considerably less floor space than ordinary radiators. Tapped 1½ inch and bushed to smaller sizes when necessary. All sections are 2½ inches center to center.

## Harris Pressure Governor for Hot Water Heating Systems

\$15  
Eliminates  
the  
Expansion  
Tank

A Harris  
Pressure  
Governor  
increases  
the efficiency  
of hot wa-  
ter Heating systems  
and displaces the anti-  
quated expansion tank.

Simply constructed and easy to install. Guaranteed to speed up circulation and saves fuel. The automatic feature is instantly adjusted for any required pressure by a set screw on top of each valve unit.

The governor is equipped with a regulating Valve and Filter. This device regulates the water capacity of the system and comes adjusted to operate under all normal conditions, but is easily changed if necessary.

Constructed of best bronze—rust and scale proof. Fully guaranteed.

## Thermostat Heat Regulator

Here is one of the most wonderful devices ever made to do away with heating plant drudgery. An automatic janitor, unless you are too lazy to set up. Operates with the utmost simplicity. Thermostat and clock are mounted in your living room, or bedroom, the motor in the basement. Before retiring, you set the thermostat for the temperature you wish maintained during the night, and the alarm clock at about two hours before you intend to arise. That's all. At the proper time, the alarm goes off, pushing the thermostat up to 70 degrees, and when you get up, your home is nice and warm. Full instructions for installation furnished with each outfit.

Outfit includes thermostat, alarm clock, high grade motor with pulley, 25 feet insulated electric cable, 2 insulated wires for connecting motor to batteries, 2 dry cell connectors, 1 dry cell platform, 4 pulleys for chain, 1 chain for operating dampers, 6 insulated cable staples and thermostat screws. (Dry cells not included.) Shipping weight, complete, about 30 pounds.

5-AN-6500. Special price, complete, without dry cells..... \$40.00

## Water Gauge Set

\$1 75

5-AN-9501. Complete water gauge set. Made with brass body, iron wheels and two guards to protect glass tube. Fitted with drain cock at bottom. Polished brass finish. 1/2 inch thread. Glass, size 5/8 x 12 inch. Price, complete..... \$1.75

## Steam Gauge

\$2 10

Pat-  
tern

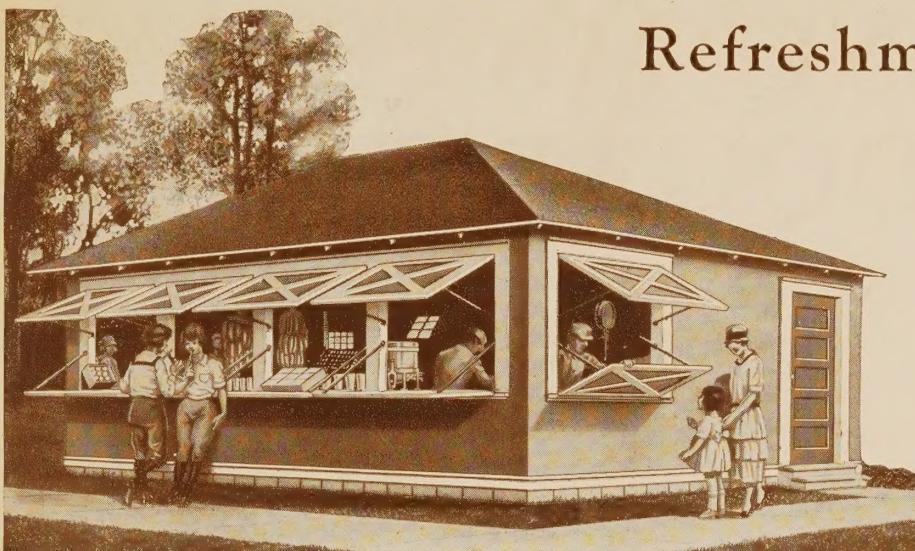

\$2 00

## Altitude Gauges

5-AN-189. Altitude Gauges are used for indicating the height of water in a hot water heating system. The red hand is movable. When you determine the height of water to just fill the system correctly, set the red hand at that point and then the indicating hand should be right on top of it. Each..... \$2.00

# Harris UNIT MADE Buildings

## Refreshment Stands

"HARRIS" Highway Refreshment Stands are the most practical buildings ever built for that purpose. A HARRIS UNIT-MADE Building can be taken down and re-erected as often as wanted, so that if the location does not prove successful—move it to some other place.

The illustration shows very clearly how the service openings are made. The canopy is supported by an iron bracket and drops down, while the shelf, also supported by brackets, folds up and the two meet and are fastened from the inside, showing a neatly paneled exterior wall when closed.

NOTE  
Complete Information and  
Prices on Request

Office Building

An ideal real estate or small office building. Built in many sizes to meet various requirements. Prices on application.

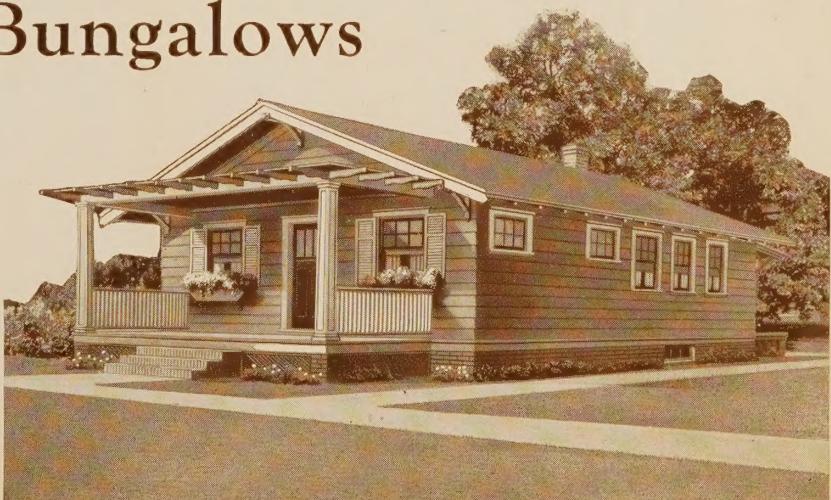

Two Room Harris Schoolhouse  
Capacity 80 Pupils

Harris Unit-Made School Buildings and Churches, easily and quickly erected. Tell us your requirements and we will gladly submit plans and prices.

# Harris UNIT MADE Bungalows

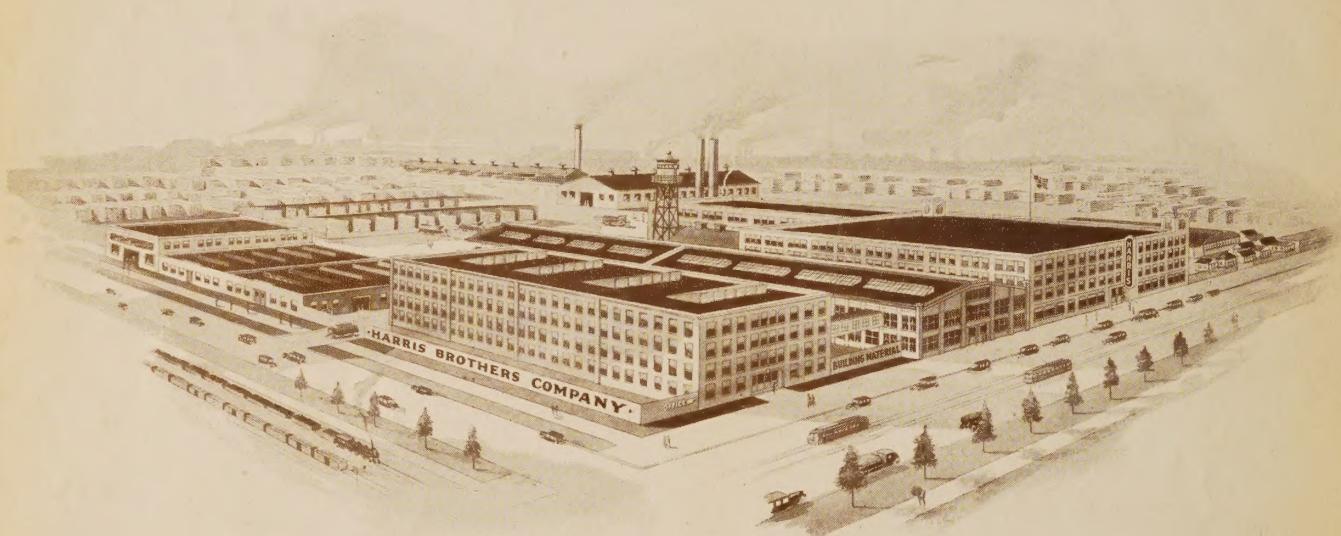

## Simple Construction

This is one of many styles available in Harris Unit-Made Bungalows. Like all of our Unit-Made Buildings, comes to you built up in sections ready to set in place. Doors and windows are all fitted and hardware applied. Any handy man can put them up. Can be furnished with double outside walls and plasterboard lining, if a permanent Home is desired. They solve the summer home problem—It costs much less to own one of these bungalows than to pay rent year after year. Call, write or phone for all details and prices.
